

Python Coding Challenge Swayable – Timothy Choi

Instructions on how to run my program

1. Please go into the Folder Directory through your terminal
2. Python must be installed and then please enter 'python DitheringBinning.py'
 - a. This will print the labeling, the percentage off and bin's information
 - b. You can change the values in DitheringBinning.py under the comment in main '# Change Values Here to see Results!'
 - i. It is preferred to not change 'number_of_bins'
3. You can also run testers by entering 'pytest' into the terminal
